DETAILED ACTION

1. This is in response to Applicant's communication on 11/21/2005

Reason for allowance

2. Claims 1,3-35 are allowed. The following is an examiner's statement of reason for allowance:

I/ Group I: Claims 1,3-14 :

Claims 1,3-14 are allowed because none of the references of record teaches or suggests the claimed **ORGANIC LIGHT EMITTING DEVICE STRUCTURE FOR OBTAINING CHROMATICITY STABILITY** having the limitations:

-- "the emissive region comprises:

a first emissive layer, comprising a first host material and a first emissive material, and a second emissive layer in physical contact with the first emissive layer and comprising a second host material and a second emissive material, and wherein: the first emissive layer is nearer to the anode than the second emissive layer, and at least one of the first emissive material or the second emissive material is a phosphorescent emissive material. "--

and all other limitations in claim 1.

II/ Group II: Claims 15-31:

Claims 15-31 are allowed because none of the references of record teaches or suggests the claimed **ORGANIC LIGHT EMITTING DEVICE STRUCTURE FOR OBTAINING CHROMATICITY STABILITY** having the limitations:

--“a first emissive layer, comprising a first host material and a first emissive material, and a second emissive layer in physical contact with the first emissive layer and comprising a second host material and a second emissive material, wherein the contact between the first emissive layer and the second emissive layer provides an electron injection barrier, a hole injection barrier, or both, the first emissive layer is nearer to the anode than the second emissive layer, at least one of the first emissive material or the second emissive material is a phosphorescent emissive material, and wherein the device emits with CIE x,y-coordinates that vary less than about 0.04 over the luminance of about 1000 cd/m² to about 20,000 cd/m² “--
and all other limitations in claim 15.

III/ Group III : Claims 32-35:

Claims 15-31 are allowed because none of the references of record teaches or suggests the claimed **ORGANIC LIGHT EMITTING DEVICE STRUCTURE FOR OBTAINING CHROMATICITY STABILITY** having the limitations:

--“ a first emissive layer, comprising a first host material and a first emissive material, and a second emissive layer comprising a second host material and a second emissive material, and a blocking layer between and in contact with the first emissive layer and the second emissive layer, wherein:
the blocking layer is an electron blocking layer or a hole blocking layer, and

at least one of the first emissive material or the second emissive material is a phosphorescent emissive material. "--
and all other limitations in claim 32.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".
